

Pursuant to the Federal Communications Commission (FCC), Bristol Bay Cellular Partnership offers hearing aid compatible cellular phones. Following is a list of phones that have been tested and rated “M” or “T” for Hearing Aid Compatibility (HAC).

Phone/Model	FCC ID Number	Air Interface & Frequency Bands	HAC	Wi-Fi Interface	Level of Functionality
Alcatel Cingular	2ACCJNO12	GSM 850/900/1800/1900	M4/T4	Yes	Low End
Alcatel go play	2ACCJN013	GSM 850/900/1800/1900	M4/T3	Yes	Low End
Cat S30	ZL5S30	GSM 850/900/1800/1900	M3/T4	yes	High End
CAT S40	ZL5540	GSM 850/900/1800/1900	M3/T3	Yes	High End
Hyundai E245sh	RQQHLT-E24FSL	GSM 850/1900	M3	no	Low End
iPhone 8	BCG-E3159A	GSM 850/900/1800/1900/2100	M3/T4	Yes	High End
LG B470	ZNFB460	GSM 850/1900	M3/T4	yes	Low End
Samsung Galaxy S7	A3LSMG930US	GSM 850/1900	M4/T3	yes	High End
Samsung Galaxy S8	A3LSMG950F	GSM 850/900/1800/1900	M3/T4	yes	High End
Samsung J2 Prime	SM-G532M	GSM 850/900/1800/1900	M3	Yes	Low End
Samsung J3	SM-J337R4	GSM 850/900/1800/1900	M3/T3	Yes	Mid-Tier
Samsung J8	A3LSMJ810M	GSM 850/900/1800/1900	M3/T4	yes	High End
Samsung Rugby II	A3LSGHA847	GSM 850/900/1800/1900	M3/T4	Yes	Mid-Tier
Snapfon ezTWO	ZXLEZTWOB	GSM 850/900/1800/1900	M3/T3	no	Low End

Hearing loss and hearing aids are individualized so customers who use hearing aids are encouraged to try our hearing aid compatible phones to determine which phone will work best for them.

#### Non-HAC Phones

Phone/Model	FCC ID Number	Air Interface & Frequency Bands	Wi-Fi Interface	Level of Functionality
Samsung J1 Mini	SM-J1058BDL	GSM 850/900/1800/1900	Yes	High End
Figo Fury	2ADX3W242	GSM 850/1900	No	Low End
Blu Z5	YHLBLUZ5	GSM 850/900/1800/1900	No	Low End

Bristol Bay Cellular Partnership's HAC mobile units are categorized by price per unit. "High End Phones (\$200+)" generally have

advanced features such as a camera, Bluetooth, and Internet access capability, increased storage and longer battery life. Mid-Tier Phones (\$150 - \$200) may have camera, Bluetooth, and Internet access capability, but older or less stylish. Low End Phones (Less than \$150) offer basic wireless features, may or may not have a camera, Bluetooth, and Internet access capability, and generally are heavier and lack such features as MP3 players and expandable memory.

The Federal Communications Commission (FCC) defines Hearing Aid Compatibility (HAC) for wireless devices in terms of radio frequency (RF) emissions and telecoil coupling. Cell Phones are tested to see if they comply with the FCC's definition of hearing aid compatibility.

"M" refers to the RF emissions level of the handset device, and means the device is intended for use with hearing aids in microphone mode. The higher the "M" rating number on the device, the more likely the device can be used with a hearing aid on the microphone setting.

"T" refers to the device's telcoil coupling ability, and means the device is intended for use with hearing aids in telecoil mode. The higher the "T" rating number on the device, the more likely the device can be used with a hearing aid on the telecoil setting. A telecoil is a small device that is built into some hearing aids for use with the telephone as well as assistive listening devices. To use the telecoil, generally either the hearing aid is switched to the "T" position or a button on the hearing aid is pushed to select the telecoil program. Some newer hearing aids will automatically switch to telecoil mode when using a phone. The telecoil picks up magnetic fields generated by telephones and converts these fields into sound. Telecoils are particularly useful for telephone communication because they permit the volume control of a hearing aid to be turned up without creating feedback or "whistling," and background noise can be reduced especially when using cell phones in noisy places. A hearing health professional can determine whether a hearing aid contains a telecoil and how it is activated.

This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids. It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service provider or phone retailer.
